Spring into Training

With a 3-part land-to-water workshop

Junior ~Apprentice

Working ~ Courier

This hands-on, land-based workshop is for both novice and experienced handlers who want to get a jump-start on water training & brush up on basic skills. If you and your dog are just starting out or if you have graduated to a higher level of water training, then this workshop will help get you focused.

Exercises at all levels can be broken down to basic skills. We will review the components of each exercise to help you give your dog a good understanding of what is required before you take your training to the water. Our last class will bridge the gap from land to water.

Participants will work in small groups with others at their training level.

Registration Deadline: March 4, 2020

Members \$40, Non-members \$50
